

Proses Engineering was established in 1989 in Gaziantep. With a 25 years experience in the industry, the company is an important brand in the country in areas of Drive Motor Speed Control, Uninterruptible Power Supply products and services. Specializing in service, quality and customer satisfaction are the main basis for the continuity and quality of our service philosophy. With Control Techniques drives, we reach significant saving rates of 15-25% in industrial motor applications resulting in a 4-6 months compensation time for the investment.
